HIGHEST ENCRYPTION AND ONLINE SECURITY STANDARDS.

WHAT SHOULD YOU CONSIDER WHEN ACCESSING BDN VIA MYBITZER?

Due to the volume of data available, it is advisable to tie access to different types and levels of BDN information to different types of users.

In addition to the option for BDN to set up a personal account or a company account for employees on the myBITZER portal, as a BITZER partner, you can also create accounts for end users – for all facilities and with access for authorised contractors.

myBITZER

BITZER DIGITAL NETWORK

WHAT YOU ALWAYS WANTED TO KNOW ABOUT YOUR COMPRESSORS

Bitzer
DAS HERZ DER FRISCHE

COMPRESSOR DATA:
AT ANY TIME
AND ANYWHERE.
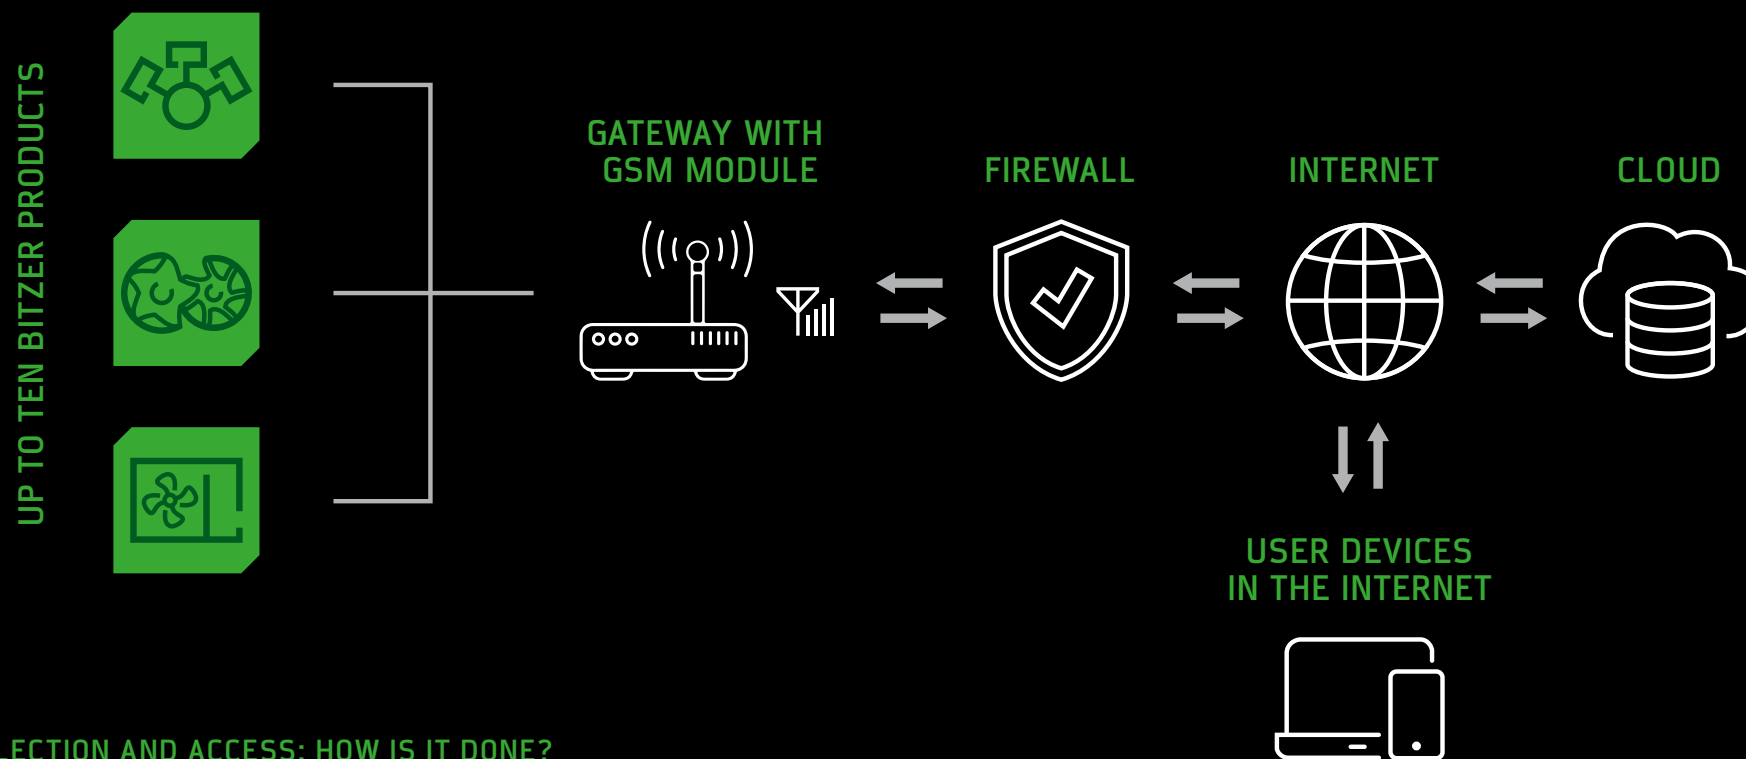

**BITZER DIGITAL
NETWORK**

OFFERS YOU:

Easy access to valuable digital services relating to BITZER compressors for refrigeration and air conditioning. This provides you with important product and application-related information on all the BITZER products you're using, including, among others, data analyses and compressor operation reports. And with it, usable findings with which you can optimise the most important aspects of the cooling systems.

YOUR ADVANTAGES:

// Access to a unique pool of real-time and historical data

// Upload or input of all background information for own BITZER components and management of service tasks

// Remote access and remote troubleshooting in real time due to connection to own refrigeration systems

// Reduction of environmental impact and lowering of operating costs

// Easier set-up and expansion of own digital service infrastructure

TYPICAL FOR AN INTELLIGENT SOLUTION.

DATA COLLECTION AND ACCESS: HOW IS IT DONE?

The on-site systems are connected in a higher-level network for monitoring and intelligent data analysis. Access to the BDN is granted via the myBITZER portal. In addition, you can register and open your BITZER products in the BDN via the BITZER SPOT app or other QR code readers. For the cloud connection, BITZER provides a completely preconfigured gateway.
